Dr Mohd Maqbool Sohil

MBBS, MD (Internal Medicine), DM (Cardiology), FSCAI (USA)

Director, Interventional Cardiology | Paras Hospitals, Srinagar, Jammu & Kashmir, India

REGISTRATION	EMAIL	ADDRESS
JKMC Reg. No. 8699	drsohailpgimer@gmail.com	Paras Hospitals, Srinagar, Kashmir

Languages: English, Urdu, Hindi

Medical registration: Registered Medical Practitioner, Jammu & Kashmir Medical Council, Reg. No. 8699 (1 August 2005; MBBS, University of Jammu, 2005). Additional qualification DM Cardiology, SKIMS (Deemed University), Srinagar, 2014, registered in the Indian Medical Register (NMC).

PROFESSIONAL SUMMARY

High-volume interventional cardiologist with 12 years of experience, **about 10,000 cardiovascular interventions** (including ~9,000 coronary angioplasties and ~1,000 non-coronary cardiovascular interventions) and **~20,000 angiographies**. Trained in Internal Medicine at PGIMER Chandigarh and in Cardiology at SKIMS Srinagar; Fellow of the Society for Cardiovascular Angiography and Interventions (FSCAI, 2021). Specialises in complex high-risk indicated PCI (CHIP), rotational atherectomy, left main and bifurcation stenting, chronic total occlusions and intravascular imaging-guided PCI, using a radial-first approach. Proctor for Boston Scientific in rotational atherectomy. First interventional cardiologist in Jammu & Kashmir to establish IVUS and rotational atherectomy in the private sector, and the first cardiologist in the region to start medical tourism in interventional cardiology. Currently Director of Interventional Cardiology at Paras Hospitals, Srinagar, after 7.5 years as Senior Consultant at Narayana Health, Ahmedabad, and a leadership role at Metro Heart Institute, Faridabad. Author of peer-reviewed publications on rotablation-assisted left main PCI, calcified coronary disease, intracoronary stem-cell therapy and cardiac pacing.

~10,000	**~9,000**	**~20,000**
cardiovascular interventions	coronary angioplasties	coronary angiographies
~800	**70–100**	**80–90%**
pacemakers & devices	rotablation cases / year	IVUS-guided PCI

PIONEERING CONTRIBUTIONS

FIRST IN J&K: IVUS & ROTABLATION

First interventional cardiologist in Jammu & Kashmir to establish intravascular ultrasound (IVUS) and rotational atherectomy (rotablation) technologies in the private sector.

FIRST IN J&K: CARDIAC MEDICAL TOURISM

First cardiologist in Jammu & Kashmir to start medical tourism in interventional cardiology.

CLINICAL EXPERTISE & PROCEDURAL EXPERIENCE

Procedural volume

- About **10,000 cardiovascular interventions**, including ~9,000 coronary angioplasties and ~1,000 non-coronary cardiovascular interventions; **~20,000 angiographies** over 12 years.
- Currently performs about 200 procedures per month, including approximately 150 coronary angiographies and 60–100 angioplasties.
- Approximately **800 cardiac rhythm devices** implanted: single- and dual-chamber pacemakers, CRT-P, CRT-D and ICDs.

Complex coronary intervention

- **Complex high-risk indicated PCI (CHIP)** performed routinely, including interventions in cardiogenic shock.
- **Rotational atherectomy:** high-volume operator (70–100 procedures per year; approx. 5–12 per month) and proctor for Boston Scientific.
- Bifurcation lesions, including left main bifurcations; calcified lesions, including calcified bifurcations with depressed LV systolic function; diffuse disease.
- Coronary chronic total occlusion (CTO) interventions performed routinely.
- **Primary PCI:** high-volume operator (approx. 12–15 primary PCIs per month), plus other emergency coronary interventions and IABP insertion.

Intravascular imaging, physiology and access

- **IVUS guidance** in 80–90% of all coronary and peripheral interventions.
- **Radial-first operator:** about 90% of coronary angiographies and interventions via the radial artery; also uses distal (dorsal) radial access.

Peripheral and structural intervention

- Peripheral angiography and angioplasty, including complex lesions and chronic total occlusions; carotid and aortic interventions.
- Structural heart interventions: PDA, ASD and VSD device closure.

PROFESSIONAL APPOINTMENTS

April 2023 – Present

Director, Interventional Cardiology

Paras Hospitals, Srinagar, Jammu & Kashmir

- Leads interventional cardiology at a 250-bed hospital with a 23-bed cardiac CCU.
- Facilities: state-of-the-art GE cath labs with StentBoost/AI; HD IVUS with ICE and peripheral IVUS probes; FFR/DFR; rotational atherectomy system; two IABPs; power injector; high-end GE echocardiography.

Previously

Head of Unit / Director / Senior Interventional Cardiologist

Metro Heart Institute, Faridabad (Delhi NCR)

7.5 years

Senior Consultant, Interventional Cardiology

Narayana Multispeciality Hospital, Ahmedabad (Narayana Health)

- High-volume coronary, peripheral, structural and device practice within one of India's largest networks of cardiac centres.

EDUCATION & TRAINING

QUALIFICATION	INSTITUTION / UNIVERSITY	PASSED	AWARDED
DM Cardiology 3-year post-doctoral programme	Sher-i-Kashmir Institute of Medical Sciences (SKIMS), Srinagar, Jammu & Kashmir	August 2014	11 October 2014
MD Internal Medicine 3-year postgraduate programme	Postgraduate Institute of Medical Education and Research (PGIMER), Chandigarh	30 June 2009	30 November 2009
MBBS	Government Medical College Jammu, University of Jammu, Jammu & Kashmir	8 June 2004	22 June 2005

FELLOWSHIPS & CERTIFICATIONS

June 2021

Fellow of the Society for Cardiovascular Angiography and Interventions (FSCAI), USA

Fellowship in Interventional Cardiology conferred by SCAI, a leading international society for interventional cardiology.

PROFESSIONAL MEMBERSHIPS

- **Fellow**, Society for Cardiovascular Angiography and Interventions (FSCAI), USA, since 2021
- **Life Member**, Cardiological Society of India (CSI)
- **Life Member**, Indian College of Cardiology (ICC)

Efficacy and safety of intracoronary transplantation of peripheral blood-derived mononuclear cells (PBMNCs) autologous stem cells in patients with acute myocardial infarction: first pilot study from North India [abstract A-19]. Catheter Cardiovasc Interv. 2021;97(Suppl 1):S23.

PRESENTATIONS & LIVE CASE TRANSMISSIONS

- **Live case transmission:** performed complex high-risk PCI broadcast live to the international virtual conference HEAL Conclave.
- Presented challenging cases and complex high-risk PCI at national and international conferences.

TEACHING & PROCTORSHIP

- **Proctor for Boston Scientific** in rotational atherectomy.
- Proctor for rotational atherectomy and complex/high-risk coronary interventions.

RESEARCH INTERESTS

Clinical research themes reflected in the publications above:

- **Calcified and left main coronary disease:** outcomes of rotablation-assisted left main PCI and rotational atherectomy in complex calcified lesions and STEMI (publications 1, 3, 4).
- **Regenerative therapy:** intracoronary autologous peripheral blood mononuclear cell therapy after acute myocardial infarction, ITPASC pilot study, first author (publications 5, 9).
- **Cardiac pacing:** ventricular function after permanent pacemaker implantation (publication 6).
- **Preventive cardiology:** cardiometabolic biomarkers in asymptomatic young adults (publication 2).
